US-09-071-845-366/c
; Sequence 366, Application US/09071845
; Patent No. 6122967
; GENERAL INFORMATION:
APPLICANT: Susan Grimm
APPLICANT: Dan T. Stinchcomb
APPLICANT: Sean Sullivan
APPLICANT: Kenneth G. Draper
TITLE OF INVENTION: RIBOZYME TREATMENT OF
TITLE OF INVENTION: DISEASES OR COMDITIONS
TITLE OF INVENTION: DISEASES OF CONDITIONS
TITLE OF INVENTION: INTRACELLULAR ADHESION
TITLE OF INVENTION: MOLECULE-1 (1-CAM-1)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               CLASSIFICATION:

Sequence 5929, Application US/09371772B

Patent No. 6566127

GENERAL INPORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Rose, Pam

APPLICANT: Bacchedo, Jaim

APPLICANT: Schobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions

TITLE OF INVENTION: Method and Reagent Endothelial Growth Factor Receptor

FILE REPERENCE: MBHB00, 876-J (237/198)

CURRENT APPLICATION NUMBER: US 60/005,974

FRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0

SEQ ID NO 5929

LENGTH: 16
     TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor FILE REFERENCE: MARBEDO, 876—7 (237/198)
CURRENT APPLICATION NUMBER: US/09/371,772B
CURRENT FILING DATE: 1999-08-10

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          US-08-582-261A-9/c

Sequence 9, Application US/08582261A

Patent No. 5817461

GENERAL INFORMATION:
APPLICANT: Hirsh, Jack
APPLICANT: Hirsh, Jack
TITLE OF INVENTION: Methods and Compositions for Diagnosis
TITLE OF INVENTION: of Hyperhomocysteinemia
TITLE OF INVENTION: of Hyperhomocysteinemia

NUMBER OF SEQUENCES: 9

CORRESPONDENCE ADDRESS:

US-07-869-933-7/c
Sequence 7, Application US/07869933
Patent No. 577036
GENERAL INFORMATION:
TITLE OF INVENTION: THE HUMAN B SUBUNIT OF THE HIGH AFFINITY RECEPTOR FOR TITLE OF INVENTION: IMMUNOGLOBULIN
TITLE OF INVENTION: IMMUNOGLOBULIN
TITLE OF INVENTION: IMMUNOGLOBULIN
NUMBER OF SEQUENCES: 34
CORRESPONDENCE ADDRESS:
ADDRESSE: Foley & Lardner
STREET: 1800 Diagonal Road, Suite 500
CITY: Alexandria
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1.1%; Score 11.6; DB 1; Length 20; 77.8%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-09-103-663-7/c

US-09-103-663-7/c

US-09-103-663-7/c

Sequence 7, Application US/09103663D

Patent No. 6171803

GENERAL INFORMATION:

APPLICANT: Kinet et al.

TITLE OF INVENTION: ISOLATION, characterization, and use of the human beta

TITLE OF INVENTION: immunoglobulin B.

TITLE OF INVENTION: immunoglobulin B.

FILE REFERENCE: 50490

CURRENT PILING DATE: 1998-06-23

CURRENT PILING DATE: 1998-06-23

EARLIER PILING DATE: 1992-04-16

NOWHER OF SEQ ID NOS: 35

Sequence 7, Application US/08726725
Patent No. 5773290
GENERAL INFORMATION
APPLICANT: Gould, Michael N.
APPLICANT: Ghen, Kai-Shun
ITLE OF INVENTION: MARWARY GLAND-SPECIFIC PROMOTERS
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSE: Quarles & Brady
STREET: 411 East Wisconsin Avenue
STATE: Milwaukee
STATE: Milwaukee
STATE: S3202-4497
COMPUTER READALE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patent In Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/726,725

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       US-08-585-684B-2099/C

'Sequence 2099, Application US/08585684B

'Patent No. 2877021

'GENERAL INFORMATION:

'APPLICANT: Stinchcomb, Daniel T.

APPLICANT: Jarvis, Thale

'APPLICANT: McSwigen, James

TITLE OF INVENTION: INDUCTION OF GRAFT TOLERANCE

'TITLE OF INVENTION: AND REVERSAL OF INMUNE RESPONSES

NUMBER OF SEQUENCES: 2751

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      0; Mismatches
